Jurnal *Sylva Lestari* is an open-access journal launched in 2013, published by the Department of Forestry, Faculty of Agriculture, University of Lampung. Jurnal *Sylva Lestari* focuses on all dimensions of forest management, including but not limited to planning, conservation, silviculture, socioeconomics, and the utilization of forest resources, with a focus in particular on the tropical forests of Indonesia. We are also eager to include contributions from other geographical scopes as long as they can convincingly demonstrate a critical significance to the concerns that are plaguing Indonesia's forested landscape. It is primarily a medium for disseminating original theoretical and experimental researches, as well as technical reviews. This journal issues one volume annually consist of three issues that delivered every January, May, and September.
