Jurnal Sylva Lestari (JSL) is an open-access journal dedicated to the advancement of science in the field of forestry. The journal's scope encompasses a wide range of topics, including:

- Forest Management: Strategies and practices for the sustainable management of forest resources.
- Forest Resources Conservation: Approaches to preserving and protecting forest ecosystems and biodiversity.
- Silviculture: Techniques and principles of cultivating and managing forest stands.
- Forest Socioeconomics: The interplay between forest ecosystems and local communities, including economic and social impacts.
- Forest Products and Wood Science: Research on the wood science and the utilization, properties, and technology of timber and non-timber forest products.

JSL primarily serves as a medium for the dissemination of original theoretical and experimental research, as well as comprehensive technical reviews. It publishes one volume annually, which consists of three issues delivered in January, May, and September. The journal is managed and published by the Department of Forestry, Faculty of Agriculture, University of Lampung. Through its rigorous peer-review process, JSL aims to contribute to the global dialogue on forest science and management, providing valuable insights and fostering innovation in the field.
